

In 2003 I underwent a makeover which included plastic surgery and dental work.

My upper front teeth were very discolored and uneven. After consulting with Dr. Schaefer we decided to place 10 beautiful white veneers over my upper teeth. This made me look healthier, more attractive, and years younger! I could trust Dr. Schaefer and his team 100% during the entire process. They made me feel comfortable and provided guidance throughout. Dr. Schaefer and his team are truly caring professionals and excellent with their expertise and service!
