

As a dental professional, I believe a beautiful smile can communicate a warm and caring personality even before words are spoken.

I have a long history of tetracycline stained teeth, (Grey discoloration due to ingestion of tetracycline while teeth are forming).

Many years ago, I had porcelain veneers placed to cover the discoloration. These veneers were an improvement, but I still did not love my smile. Over the next 20 years, I continued to watch advances in cosmetic dentistry. Last year, I decided to have my veneers replaced.

I called Dr. David Schaefer to discuss my desire for a smile makeover. Dr. Schaefer recommended a cosmetic gum surgery procedure to correct my specific periodontal concerns, and ten porcelain veneers. After accepting this treatment plan, I scheduled my appointments to begin the "makeover".

My experience with Dr. Schaefer and his staff was always terrific. Everyone in the office is truly professional, caring and they are all perfectionists!! They made me feel comfortable and I always felt that I was their most important patient!!!

My new smile is amazing!! I am much more confident with my appearance and never stifle a huge smile!! I have compliments frequently on the appearance of my smile. Patients are always inquiring how I keep my teeth so pretty and bright. What a difference!!!

My most awesome compliment came from my husband who said "I was looking at you smiling yesterday and I thought; now that is a beautiful smile!!!"

I would highly recommend Dr. David Schaefer as a cosmetic dentist for any smile makeover.
